

Nishant Vishwakarma

nishwakarma3@gmail.com | 7909075195 | Bengaluru, India | nishvish.github.io/profile

I like solving problems at the system level—building things that connect, scale, and just work.

EXPERIENCE

Fullstack Developer, Sphere Travelmedia and Exhibitions

04/2026 – Present | Bengaluru

- Rebuilt the company website and backend using Laravel, improving performance, maintainability, and scalability.
- Improved UI/UX with cleaner layouts, navigation, and consistent branding.
- Built email and badge generation workflows based on user category and check-in checkpoints (travel/hospitality segmentation).
- Developed internal tools like OCR card scanner and badge printing system for event operations.
- Integrated Ollama local AI workflows to automate internal processes.
- Built mass mailing system and workflows for lead conversion, exhibitor onboarding, and payment processing.

Jr. Data Analyst, Sphere Travelmedia and Exhibitions

04/2025 – 04/2026 | Bengaluru

- Built data collection tools and used different platforms to gather and organize new data.
- Designed a centralized SQL database for storing and managing business data.
- Organized and migrated Excel data into structured SQL tables.
- Developed and implemented the badge printing system used for exhibition registrations and attendee management.
- Managed on-ground operations for registrations, exhibitor badge printing, badge distribution, and volunteer coordination during events.

Event Executive, Sphere Travelmedia and Exhibitions

12/2023 – 04/2025 | Bengaluru

- Called attendees and exhibitors to update information and share event details.
- Sent event reminders and follow-up emails for exhibitions and roadshows.
- Coordinated with hosted buyers and association representatives for event participation.
- Helped manage registrations and basic event operations during exhibitions.

PROJECTS

PySwiss - Python Code Runner Environment

- Offline Python code runner and automation environment.
- Preloaded automation scripts with support for writing and saving custom scripts.
- Built-in tools for FTP/QR-based file transfer, file organization, and image compression.
- Productivity-focused workflow with reusable automation utilities and planned Ollama-based local AI integration.

Scale Identifier – Real-time Pitch Detection & Visualizer

- Developed a real-time audio analysis system that detects vocal pitch using auto-correlation and maps it to 12 swarasthanas. Built a dynamic visual interface that highlights detected notes and displays frequency alignment in real time using a radial “spider web” visualization.
- Implemented microphone input processing, frequency detection, and cent-based accuracy matching for precise note identification.

👋 Real-Time Gesture Control System (Python, MediaPipe, Flask, PyAutoGUI)

- Built a real-time hand gesture recognition system for OS-level control using camera input
- Designed modular gesture-to-key mapping system for keyboard automation (navigation, modifiers, shortcuts)
- Implemented temporal stability filtering using history buffers to reduce false gesture triggers
- Developed hold-state key handling (e.g., ALT hold mode) and system toggle functionality
- Optimized low-latency execution loop for real-time responsiveness

🤖 Local AI Code Generation Agent (PHP, Ollama, cURL, LLM Automation)

- Built an autonomous AI agent that generates complete PHP applications from natural language prompts
- Integrated local LLM (Ollama – qwen2.5:14b) for offline code generation workflows
- Automated project scaffolding with dynamic folder creation and file writing
- Engineered prompt system to enforce raw executable code output without formatting artifacts
- Implemented secure filesystem handling and API reliability controls

🧠 AI-Powered RAG-Based Knowledge System (Laravel, MySQL, LLM Integration)

- Designed and built a Retrieval-Augmented Generation system for automated FAQ and knowledge retrieval
- Developed API-driven architecture using Laravel for AI response workflows
- Structured database layer for efficient knowledge storage and retrieval
- Implemented automated FAQ update pipeline for dynamic content updates
- Integrated LLM-based response generation for contextual answers

COURSES
Python DSA , Udemey 01/2026 – 04/2026 OOPs ,Linked Lists, Stacks, Queues, Dynamic Programming,
Data Analyst , IBM 03/2023 – 06/2023 • SQL, Python, Excel, IBM Cognos
Python For Trading , QuantInsti® 04/2023 – 04/2023

EDUCATION
B-Tech in Electronics Engineering , Raajdhani Engineering College 2018 – 2022 Bhuwaneshwar, Odisha
Diploma in Electrical Engineering , Koustuv School of Engineering 2015 – 2018 Bhuwaneshwar, Odisha

SKILLS
Languages — Python SQL PHP JavaScript MQL5
Frameworks & Backend — Laravel Django Express.js RESTful API Development
Databases — MySQL MongoDB
Version Control — Git
DevOps & Deployment — Docker Linux Servers cPanel
AI & Automation — Ollama, LLM Workflows, AI Agents

ADDITIONAL INFORMATION
Total Experience - 2 Years 6 Months
Languages English, Hindi
